

COLORED LAMPS

Create a unique environment that sets your salon apart.

When you're trying to set a specific mood and emphasize your salon's unique personality, there's no more effective way than with LightSources' colored lamps.

LightSources has developed a proprietary process for producing "colored" tanning lamps. This means that your favorite brand of tanning lamp can now be manufactured in a wider range of colors. Manufactured at LightSources' European factory, these colored lamps meet the same strict standards for quality and performance that all our innovative lamp technologies meet.

- **Colored lamps help create a unique and inviting environment.**
- **Define your salon's distinctive style and personality.**
- **Available in many colors, including pink, blue, green, and yellow.**
- **Set your salon apart from the average tanning experience.**

Colored lamps are one of the most effective ways to visually distinguish your salon.
